PHP HTML CSS jQuery SQL

WordPress Bootstrap Firebase Elementor

SOME OF MY WORKS

Form craft WordPress plugin ⧉
- This plugin simplifies website form creation and management with intuitive ease, enhancing user experience and efficiency.

IdeaBit's website ⧉
- This website is an ecommerce platform for plugins, operating on a custom WordPress template without using prebuilt options such as Hello Elementor or Divi Builder.

GreayBayx ⧉
- This site is a WordPress website integrated with its built-in blogging system.

WooCommerce analytics suite WordPress plugin ⧉
- This WordPress plugin enhances WooCommerce orders by integrating improved Google Chart graphs. It adds an extra column to the WooCommerce order table, displaying the number of orders per customer. Additionally, in the WordPress dashboard, it provides an overview for the current quarter.

Beyond the binding books ⧉
- Its an e-commerce website from scratch using Core PHP, without relying on prebuilt CMS platforms like WordPress or Shopify. The website functions as a digital library where users can rent books based on their desired rental period, with charges applied accordingly.
